

CESSNA & PIPER SEAT BELTS & HARNESSSES

BECAUSE WE KNOW SAFETY IS A PRIORITY IN YOUR AIRPLANE!

FAA Approved shoulder restraint systems in your aircraft provide the best possible safety for your crew and passengers. We developed these affordable systems for production aircraft in cooperation with the FAA, therefore each H-600 series comes with an FAA STC/PMA. Our high quality belts come in a full array of colors. The kits include one standard belt with a 3-bar slide (retain your present fitting), one "Y" style shoulder harness (with attaching hardware) and installation instructions. Our line of seat belts and harnesses is constructed with the highest quality materials and with careful attention to workmanship. Each installation kit shown includes one belt, one harness, attaching hardware and installation instructions. The standard seat belt with 3-bar slide and the Y-style shoulder harness included is shown and described further on page 179.
